Controls and compliance checklist Botium Toy's

Controls assessment checklist

Yes	No	Control
	\checkmark	Least Privilege
	\checkmark	Disaster recovery plans
	\checkmark	Password policies
	\checkmark	Separation of duties
\checkmark		Firewall
	\checkmark	Intrusion detection system (IDS)
	\checkmark	Backups
\checkmark		Antivirus software
	\checkmark	Manual monitoring, maintenance, and intervention for legacy systems
	\checkmark	Encryption
	\checkmark	Password management system
\checkmark		Locks (offices, storefront, warehouse)
\checkmark		Closed-circuit television (CCTV) surveillance
\checkmark	\checkmark	Fire detection/prevention (fire alarm, sprinkler system, etc.)

Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
	\checkmark	Only authorized users have access to customers' credit card information.
	\checkmark	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
	\checkmark	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
	\checkmark	Adopt secure password management policies.

General Data Protection Regulation (GDPR)

Yes	No	Best practice
	\checkmark	E.U. customers' data is kept private/secured.
\checkmark		There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
	\checkmark	Ensure data is properly classified and inventoried.
\checkmark		Enforce privacy policies, procedures, and processes to properly document and maintain data.

System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
	\checkmark	User access policies are established.
	\checkmark	Sensitive data (PII/SPII) is confidential/private.
\checkmark		Data integrity ensures the data is consistent, complete, accurate, and has been validated.
	\checkmark	Data is available to individuals authorized to access it.

Recommendations:

To strengthen Botium Toys' overall security posture, it is critical to implement missing controls such as intrusion detection systems (IDS), encryption, and a password management system. These controls directly address high-priority risks such as data breaches, unauthorized access, and credential theft. Additionally, manual monitoring of legacy systems should be prioritized to ensure vulnerabilities in outdated infrastructure are not exploited. Establishing proper disaster recovery plans and separation of duties will further enhance resilience and accountability.

On the compliance front, Botium Toys must fully align with PCI DSS, GDPR, and SOC requirements to avoid legal penalties and build customer trust. Emphasis should be placed on securing customer credit card data through encryption, access controls, and secure password policies. For GDPR, clear privacy protocols and a formal breach notification plan must be established. Addressing these gaps proactively will reduce regulatory risk and improve Botium Toys' ability to protect sensitive information and maintain operational continuity.
